1 [Toward a statistical knowledge network](#)

 Gary Marchionini, Stephanie Haas, Catherine Plaisant, Ben Shneiderman, Carol Hert
 May 2003 **Proceedings of the 2003 annual national conference on Digital government research dg.o '03**
Publisher: Digital Government Research Center

 Full text available: pdf(138.26 KB) Additional Information: [full citation](#), [abstract](#), [references](#)

This paper describes an architecture for a statistical knowledge network that depends on user interfaces as the glue among the components. These interfaces aim to serve non-expert users with diverse needs and statistical and computing experiences. Such interfaces are crucially dependent on different indexing schemes and good metadata.

2 [Infrastructure: Adding a fourth dimension to three dimensional virtual spaces](#)

Robina E. Hetherington, John P. Scott

 April 2004 **Proceedings of the ninth international conference on 3D Web technology**
Publisher: ACM Press

 Full text available: pdf(336.66 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The development of new standards for distributed data offer new possibilities to combine and display multiple types of information. This paper is concerned with an architectural and historical application of X3D and XML to objects, such as buildings, which have an organic quality and tend to evolve over time. The display of a 3D computer model does not always adequately describe the building or artifact and additional data are often required. This paper describes and evaluates techniques for the ...
